LI 700® is a non-ionic penetrating surfactant that reduces off-target spray drift and reduces spray water pH. Unique formulation technology and quality ingredients separate LI 700 from the imitators.

Product Benefits:

TO: Drift reduction with performance-sized droplets
ON: Droplet retention by adhesion and spreading
IN: Increased penetration without cuticle disruption

- Acidification properties reducing spray solution pH, preventing pesticide degradation and maximizing performance
- LI 700 is a low-foaming surfactant and will not cause foam problems in the spray tank

PO Box 4, Ellendale, ND 58436

SELENIUM CAUTION: Directions for use must be carefully followed. Do not use in association with other feed containing supplemental selenium. **WARNING:** Contains high levels of copper. Do not feed to sheep.

FEEDING RECOMMENDATIONS

Expected intake: 82.5-165 grams (3-6 ounces/ 25 - 3 lbs.) per head per day. Product should be available continuously. Locate tubs near a source of water, salt or loafing areas. On open range locate tubs where animals congregate, near gaps or along trails. Variables in consumption could be temperature, humidity, type of animal, animal size, stage of production and animal health. The quality, source, availability of roughage and/or light grain may also affect consumption. Measure product upon first introduction to figure consumption. Tub holds approximately 3.2 kg/cm (18 lb. per inch). Increase consumption by decreasing number of head or adding another tub. To reduce consumption, increase number of head or move tubs away from congregating areas. If this fails, remove a tub. Always provide a fresh, clean source of water and free choice salt.

Available in 250, 200, 100 lb.
(113, 91, 45.5 kg) sizes.

This feed has added selenium at 6 mg/kg.
